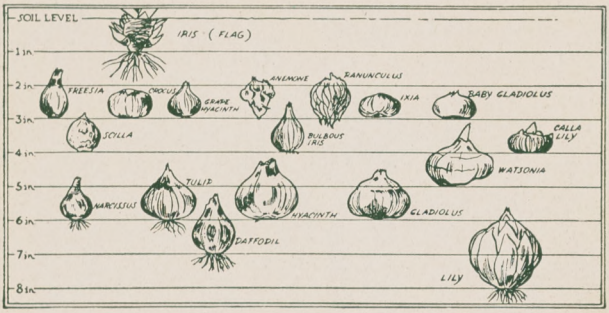
1947 FALL PLANTING GUIDE

CULTURAL INSTRUCTIONS—BULBS



BULB PLANTING CHART

GENERAL. Dig deeply, adding peat or compost. Manure, if used, should be thoroughly rotted and placed well below bulbs or added as mulch after planting. Do not cut foliage until bulbs are completely ripened.

DAFFODILS AND NARCISSI. See page 1.

TULIPS. See page 6.

DUTCH IRIS. Plant October to December about six inches apart. Leave 5 or 6 blades of foliage when cutting blooms. Bulbs may be divided each year or left in soil.

RANUNCULUS AND ANEMONES. Soak bulbs for one hour before planting. Plant six inches apart from October to December in well-drained soil. Keep moist while new growth is starting. Plant with sharp prongs down.

HYACINTHS. Plant seven inches apart, September to December. Cultivate top soil after foliage is ripe and dry. Bulbs may be left in ground or dug, as preferred.

BEARDED IRIS. Plant July until January about 12 inches apart. Water at two-week intervals until plants are established. Split every two or three years.

LILIES. Tilt bulbs when planting so that water will not drain into scales. Planting distance 12 inches.

WATSONIAS. Same culture as Gladioli. Plant 4 inches apart in October and November. Bulbs may be left in ground for several years.

FREESIAS, TRITONIAS AND SPARAXIS. Plant about 4 inches apart as early as bulbs can be obtained, in light, well-drained soil in full sun. Keep soil moderately moist. Bulbs may be left in soil or dug each year after foliage ripens.

MUSCARI, SCILLAS AND CROCUS. Plant 3 to 4 inches deep and 2 to 3 inches apart in full sun or light shade, October and November. Divide every three years for best results.

DAFFODILS AND NARCISSI

CULTURAL INSTRUCTIONS. Dig soil deeply before planting. Plant Daffodil and Narcissi bulbs 6 or 7 inches deep and about 12 inches apart. October to December is the best planting time. Water thoroughly after planting to stimulate root growth. Natural rainfall should be enough water up to the blooming period, but the bulbs should not be allowed to become dry at any time.

After blooming, water daffodil bulbs for a month before allowing them to dry. Remove dead foliage when dry and cultivate top soil in preparation of planting shallow-rooted summer annuals.

Daffodil bulbs may be left in the ground 3 to 5 years or more without removal. Lift bulbs and divide them every 3 to 5 years, or when crowded.

QUANTITY RATES—ALL BULBS

Six bulbs (of one variety) at the 12 rate; 50 bulbs of one variety take the 100 rate; 500-1000 bulbs take a 5% discount from the 100 rate.

INSTRUCTIONS FOR ORDERING—See inside back cover.

TULIPS

CULTURAL INSTRUCTIONS

October to December is the best time to plant tulip bulbs, although they may be planted until early January. Plant tulips 6 inches deep in sandy soil and 5 inches deep in heavy soil. Place a handful of sand under each bulb and water thoroughly after planting. Do not allow soil to dry out, especially after growth appears above soil surface. Do not allow manure or chemical fertilizer to come in contact with the bulbs. Should soil be poor, dig in well-rotted cow manure several weeks before planting. For best results, plant new tulip bulbs every year.

ROSES

A NEW CLIMBING ROSE

HIGH NOON. CR8. (Plant Pat. No. 704.) Vigorous climber producing lemon-yellow, double blooms. A continuous bloomer with clean, glossy foliage. $2.50.

"PEACE"

The Finest New Rose of the Decade.

PEACE. R43. (Mme. A. Meilland.) (Plant Pat. No. 591.) This All-American Winner for 1946 is still receiving wide acclaim. One marvel of this rose is the range of colors through which it passes —from opening yellow buds with edges of picoteed cerise, to glorious 5-inch blooms of alabaster white. Each petal is edged with pink which seems to deepen as the bud opens around a high-pointed center of tawny yellow. The vigorous plant with clean, glossy foliage is as superior as the bloom. Recommended for all sections without reservation. $2.00 each; 3 for $5.00.

R43. PEACE, $2.00.

APRICOTS

BLENHEIM. FT101. (Mid-June.) California's leading variety. Round-oblong fruit above medium size. Skin clear orange-yellow with bright red blush. Flesh orange-yellow, juicy and sweet.

MOORPARK. FT102. (June.) Home canning and local market variety. Large fruit with clear yellow, juicy flesh. Skin orange-yellow with brown spots.

NEWCASTLE EARLY. FT103. (May.) Early shipping variety. Fruit medium sized and round; skin lemon-yellow. Flesh deep yellow, juicy and sweet.

ROUTIER'S PEACH. FT104. (Early June.) Excellent for home orchard and drying. Fruit extra large; skin orange-yellow splashed with red. Flesh saffron-yellow, juicy, fine grained, with strong apricot flavor.

ROYAL. FT105. (Early June.) In demand by California canners and dried fruit houses. Fruit is large and oval. Skin medium-yellow; flesh deep yellow, firm and juicy.

TILTON. FT106. (Late June.) Popular for home and commercial canning. Freestone. Skin orange-yellow; flesh clear yellow, fine grained and very firm.

FIGS

BROWN TURKEY. FT131. Produces large, elongated fruits, rich purplish-brown in color. Flesh is strawberry-red, fine grained, sweet and juicy.

DURO BLACK. FT132. Fruit large; skin smooth violet-black with green neck; pulp reddish, shading to violet near the skin. Good home orchard variety thriving near the coast or in the valleys.

KADOTA. FT133. The leading canning fig. Fruit medium size, light green in color. Pulp is very sweet, of good quality and practically seedless.

MISSION. FT134. Oldest and best all-purpose fig. Medium to large fruit, dark purple to black in color. Produces two distinct crops.

WHITE ADRIATIC. FT135. The leading drying fig of the San Joaquin Valley. White fruit is medium to large; pulp reddish and of good quality.

NECTARINES

All of our Nectarine varieties except Garden State are white fleshed. All are freestones except Quetta.

GARDEN STATE. FT141. (Plant Pat. No. 92.) (Early July.) A beautiful new yellow fleshed nectarine; juicy, tender and very palatable. Introduced in New Jersey, it is a fine addition to California varieties. (Add 10c royalty.)

GOLD MINE. FT142. (July.) Delicious home orchard variety. Large attractive fruit; white flesh; free pit.

GOWER. FT143. (Early July.) Standard shipping variety. Large, round fruit; creamy white flesh, reddish pink at pit. Juicy, firm and good flavor.

QUETTA. FT144. (Early July.) Popular clingstone shipping variety. Highly colored skin; unusually firm white flesh.

STANWICK. FT145. (August.) Good shipper, fine for drying and canning. Large pale green fruit tinged purple. Tender white flesh is aromatic and delicious.

VICTORIA. FT146. (Late August.) Medium large fruit; skin greenish yellow, crimson on sunny side. Flesh medium firm, sugary and of excellent flavor. Good shipping and drying fruit.

Roeding's Quality PEACHES

FREESTONE PEACHES

ALEXANDER. FT201. (May.) Very early white fleshed peach. Greenish white skin and flesh. Juicy and of good flavor.

BABCOCK. FT202. (Early July.) Popular home orchard and commercial variety. Beautiful red colored fruit; flesh non-acid, honey-sweet.

CURRY SEEDLING. FT204. (Late August.) Splendid yellow freestone. Large fruit, ripens late.

EARLY ELBERTA. FT205. (Early July.) Has all the fine characteristics of its parent, plus the advantage of ripening earlier.

ELBERTA. FT206. (Mid-July.) National favorite mid-season yellow freestone used for canning, drying and eating fresh. The fruit is large, yellow and of good flavor.

FAY ELBERTA. FT207. (Late July.) Finest of the Elberta types. Flesh sweeter than Elberta; ripens a few days later. Good home canning and commercial fruit.

FIDLER. FT208. (October.) A good late ripening variety. Firm yellow flesh with a pleasing flavor.

FISHER. FT209. (June.) Firmness and roundness give this new peach good shipping qualities. Unsurpassed for eating fresh. Fine "peachy" flavor and smooth texture. Splendid for home orchard. (Add 20c royalty per tree.)

J. H. HALE. FT213. (July-August.) A widely planted shipping peach. Beautiful fruit is large and almost fuzzless. Flesh yellow, red at pit, unusually firm. In demand for home canning.

LOVELL. FT214. (Late August.) Famous three-way peach; for shipping, drying and canning. Vigorous grower; heavy bearer.

MILLER'S LATE. FT215. (Oct.-Nov.) Latest ripening freestone; good for home orchard in warm sections. Fruit medium to large and of good quality.

MUIR. FT216. (Late August.) Unexcelled for drying. Very high sugar content. Large fruit; clear yellow to pit.

NECTAR. FT217. (Plant Pat. No. 86.) (Early July.) The finest early white-fleshed freestone we have ever seen. It has size, beautiful coloring, a distinctive flavor with a delightful suggestion of nectarine tang. Should be in every family orchard. (Add 20c royalty per tree.)

RIO OSO GEM. FT218. (Plant Pat. No. 84.) (Mid-August.) Extra large fruit with almost fuzzless skin blushed deep red. The big commercial money-maker and "tops" for home orchards. (Add 10c royalty per tree.)

SALWAY. FT219. (Sept.) A fine yellow freestone ripening when good peaches are scarce. Fruit large with deep yellow, very juicy flesh.

STRAWBERRY FREE. FT220. (Early July.) A dandy early white peach. Creamy white skin partly covered with dark red. White flesh, red at pit; tender and juicy. Splendid table peach.

YELLOW ST. JOHN. FT222. (Late June.) Medium size fruit, round and well colored. The yellow flesh is of fine eating quality.

CLING PEACHES

CAROLYN. FT203. (Late August.) A new productive cling having many of the popular features of the canning cling; large size with flesh of clear yellow and a small pit.

FORTUNA. FT210. (July.) A new early yellow cling valued as one of the first commercial canning clings to ripen.

GOMES (STUART). FT211. (Late August.) Not a new peach, but one that is receiving more attention because of its valuable ripening position following Halford.

HALFORD No. 2. FT212. (Mid-August.) Large, uniform, round fruit. Golden yellow skin. Flesh sweet and deep yellow to the pit. A favorite with canners.
SULLIVAN No. 4. FT221. (Sept.) A superior variety introduced by us to replace Phillips. Fruit large and yellow. Flesh clear yellow to the very small pit; rich flavor. Consistently heavy producer and earlier than regular Sullivan. (Add 5c royalty per tree.)

PLUMS

BAVAY'S GREEN GAGE. FT401. (July.) A large, round greenish-yellow plum. Flesh sweet and of fine flavor. Very popular home orchard and canning variety.
BEAUTY. FT402. (Early June.) The earliest important commercial variety. Heart-shaped fruit is medium-large; beautiful crimson color. Good flavored, flesh firm enough for shipping.
CLIMAX. FT403. (June.) One of the finest of all eating plums. The fruit is large, heart-shaped and cherry-red in color. The flesh is sweet, juicy and rich. Heavy bearing trees at an early age.
DAMSON. FT404. (August.) A tart plum popular for the home orchard for its culinary value. The fruit is small, dark purple in color with a heavy bloom. Makes excellent jam.
DUARTE. FT405. (July.) A blood-red plum that has gained wide favor as a shipper. Large, heart-shaped fruit; red skin; firm flesh is blood-red in color; sweet and excellent flavor. Trees are good bearers.
PRESIDENT. FT406. (Sept.) A late shipping variety popular in most sections. The fruit is large, roundish, dark blue in color. Yellow flesh is of fine texture.
SANTA ROSA. FT407. (Mid-June.) One of California's leading shipping plums. It has large size, firm flesh and good eating qualities. Fruit reddish in color, juicy and has a pleasing tart flavor. Very vigorous, productive tree.
SATSUMA. FT408. (July-August.) An old variety still popular as a source of canning plums. The fruit is large, nearly round; color is dark red; flesh is deep blood-red and juicy.
WICKSON. FT409. (Early August.) Popular, important shipping plum. Heart-shaped, large fruit is straw-yellow in color turning to a beautiful cherry-red as it ripens. Flesh firm, juicy and luscious. Good keeper.

PRUNES

COATES 1418. FT501. Commercial drying prune. Good size; skin deep purple-blue with light blue bloom; flesh sweet, yielding a high sugar content.
FRENCH IMPROVED. FT502. Popular commercial prune. Medium size; skin of good texture, dark blue in color. Flesh golden, firm, sweet and fine grained with high sugar content.
IMPERIAL EPINEUSE. FT503. Extra large fruit can be used for drying or eaten fresh. Skin purplish-red; flesh greenish-yellow, high sugar content. Plant with French Improved for pollination.
STANDARD. FT504. Combination shipping and drying fruit. As fresh fruit keeps well; can be shipped dead ripe. Fruit large, purple in color with thick blue bloom. Amber flesh is fine grained, good flavored.
SUGAR. FT505. Earliest of all. Skin dark purple, thick white bloom. Flesh tender and sugary. Vigorous tree.

ALMONDS

DRAKE'S SEEDLING. NT1. Late bloomer bearing abundant crops. Medium sized nut, roundish in shape; medium soft shell. Kernel short and plump with rich flavor.
I.X.L. NT2. Sturdy tree producing large nuts. Soft, smooth shell has fine color. Kernel is large and plump. Plant with Texas or Nonpareil.

ALASKA. FT1. (Plant Pat. No. 699.) Crispy cool, has splendid production and handsome size and shape. October fruits are "banks of snow" against dark green foliage.

CRIMSON GOLD. FT2. (Plant Pat. Pending.) A fine crisp apple of medium size with bright red skin and white flesh. When sliced and cooked, flesh turns golden yellow resembling sliced cling peaches.

ETTER'S GOLD. FT3. (Plant Pat. No. 659.) Large, plentiful, golden fruits begin to mature in October; crisp and delightful to eat even when overripe. Sprightly, mild sub-acid flavor and firm flesh persist through cooking.

HUMBOLDT. FT4. (Plant Pat. No. 658.) Medium-sized fruits maturing in late fall have creamy flesh, tinted pink, showing through transparent skin.

JONWIN. FT5. (Plant Pat. No. 710.) A hybrid of Jonathan and Baldwin. This delicious red apple combines the best features of both. Jonwin develops large size fruits of Baldwin and ripens in August-September with Jonathan.

PINK PEARL. FT6. (Plant Pat. No. 723.) Remarkably transparent skin glows with the color of pink flesh beneath. A startling "bouquet" is discovered with the first bite into this medium to large sized apple ripening in September.

WICKSON. FT7. (Plant Pat. No. 724.) Masses of brillaint red fruits almost conceal the foliage in fall. The flavor is enticing and sugary sweet. Not only a fine small apple for fresh eating, Wickson is deliciously spiced, unsurpassed for jam and jelly.
